

Code Signing Enrolment

1. Customer does the enrolment using this Token number by visiting the URL:
<http://www.verisign.com/products-services/security-services/code-signing/digital-ids-code-signing/index.html>
2. On that page they select the type of CodeSigning ID they wish to purchase (Microsoft Authenticode, Sun Java Signing, etc.). Because the tokens are valid for one-year certificates only, they must be sure to select the one-year validity period option during the enrollment. They will receive a token enrollment error if they do not choose the correct option.
3. At the payment options page, they need to select "token" as the form of payment and paste the token number in the field provided.
4. Once the enrolment is complete and complete documentation send (details as per below) they will get an email approval from VeriSign in next 5 working days stating that their Code Signing certificate is approved.
5. The customer needs to again follow the steps and download the certificate from the **same Browser used ie same system used for initial enrolment.**

Validation Plan

Set of Documents required

- **Company Registration document**
- **Telephone bill in name of company** (If client don't have phone bill under company's name, they have to provide us a verification letter, attested by Notary Public)
